Profile summary

Full Stack Engineer with over 3 years of experience in developing and deploying production-ready mobile and web applications utilizing React Native, React.js, Flutter, and Node.js. Demonstrates strong expertise in offline-first application design, RESTful API development, Firebase integration, and app store deployment processes. Skilled in building scalable, high-performance solutions that enhance user experience across platforms. Proven ability to deliver robust applications with efficient backend services and seamless frontend functionality.

Skills

React Native | React.js | TypeScript | Flutter | Dart | Node.js | Android | Rest API Design | Firebase | HTML | CSS | Express.js | Javascript | Github

Work Experience

Software Engineer – 23V (Tevis) Software Private Limited **Jan 2026 - Present**

- **AMPA Healthcare Platform | React Native, React.js (Vite), Node.js, Express.js, REST APIs**

- Built dynamic patient questionnaire modules in React Native and React.js to streamline clinical data capture.
- Developed customizable prescription templates, reducing manual data entry and input errors.
- Integrated WebViews into the React Native app to deliver a consistent web and mobile experience.
- Implemented client-side routing and deep linking in React.js (Vite) for direct navigation to specific patient screens.
- Built Driver.js onboarding walkthroughs to shorten the learning curve for new users on clinical workflows.
- Developed Node.js/Express.js REST API endpoints and resolved backend defects in questionnaire and prescription workflows.

Software Engineer – Netwin Infosolutions **Aug 2023 - Dec 2025**

- **Children's Play Area Booking System | React Native, React.js, Node.js, Express.js, Firebase, Razorpay**

- Developed and published a cross-platform booking app to the Apple App Store and Google Play Store using React Native.
- Integrated Razorpay SDK for in-app payments; built Node.js/Express.js REST APIs for order creation and server-side payment signature verification.
- Extended the existing React.js admin panel and website to support mobile bookings, payments, and reporting.
- Implemented multiple booking flows with custom product selection, plus branch-wise ratings and reviews.
- Generated a unique barcode per confirmed booking for on-site check-in and validation.
- Built dynamic offer banners and Firebase Cloud Messaging (FCM) push notifications to increase user engagement.

- **Freelancer Staffing Mobile App | Flutter, Dart, REST APIs, Firebase Cloud Messaging**

- Designed and developed a Flutter app enabling freelance nurses to register via social login (OAuth) and set preferred work days and shift timings.
- Built profile onboarding with approval-based access control, allowing nurses to browse and apply for shifts across hospitals, nursing homes, and elder care facilities.
- Implemented push notifications for shift allocation and auto-sync of confirmed shifts to Google Calendar.
- Integrated existing backend REST APIs for authentication, profile management, shift listing, and shift applications.
- Implemented dynamic light/dark theming.

- **Field Sales Order System | React Native, SQLite, Node.js, Express.js, AdminLTE**

- Built an offline-first React Native app for field sales reps, with a down-sync API that downloads full datasets to on-device SQLite on first login.
- Designed relational SQLite schemas for customers, products, and orders, enabling order capture without network connectivity.
- Implemented barcode scanning and product/customer search to streamline order entry (store, items, quantity, date).
- Developed up-sync workflows (end of day or on network restore) using Node.js REST APIs to persist orders in the backend database.
- Added sync-status tracking to separate synced and unsynced records, preventing data loss.
- Developed an AdminLTE-based admin panel for back-office users to view and manage synced orders.

- **Employee Job Tracking App | React Native, Google Maps API, Geolocation, REST APIs**

- Implemented real-time live location tracking using device geolocation and Google Maps to display employee position.
- Transmitted periodic location updates to the backend via REST APIs for monitoring and tracking.

Internships

Intern – Netwin Infosolutions **6 Months**

- Built responsive, dynamic user interfaces using HTML, CSS, and JavaScript.
- Collaborated with senior engineers, product managers, and QA to deliver features on schedule.
- Wrote system and feature documentation to improve maintainability.

Education

MCA | Engineering **2023**
K K Wagh College of Engineering, Nashik
Grade - 8.7/10

B.C.A. | Computer Science **2021**
Abasaheb Garware College of Arts & Science, Pune
Grade - 9.6/10

12th **2018**
Maharashtra, English
Marks - 78%

10th **2016**
Maharashtra, English
Marks - 82%

Extra-curricular activities

College Technical Activities

Participated in college-level technical projects and team collaborations during B.C.A and M.C.A, contributing to practical application development and documentation.

Additional information

Languages: English, Marathi, Hindi
